## ✓ Technical skills

### Web development

JSP/Tomcat

HTML 5 / CSS 3

JavaScript

jQuery

Angular.js

Node.js

PHP

ASP/VB Script

### Programming

Java

Shell

Perl

Python

Android

### Tools

Éclipse

IntelliJ

Web Storm

Grunt

Bower

Yeoman

### Team work

GitHub

Trello

Slack

Cacoo

Agile methods

TDD

### Network

OSI Model

TCP/IP

Nating

Routing

DNS

Sockets

### Database

MySQL

MongoDB

### Environment

Linux

Windows

OSX

## Personal Projects

### Web application + RESTful API

Application to manage a student bike repair club. This help the administrator to schedule the bike component orders and to give access to the local of members depending of their status.

Technologies: Angular.Js, Node.Js, MongoDB, Grunt, Yeoman, Bower

### #CAMPCHICKENS2015 Google Play

Mobile application made for the training camp of my triathlon club. This application gave access to the list of things that had to be bring, contacts information and the map of the bike ride.

Technologies: PhoneGap, HTML5, CSS, JavaScript, Google Maps API

## Free Time

Share time with my friends

Play drums and guitar

Practice triathlon in a club

Going to software meetup
